Date: _____

To whom it may concern,

Good day!

We are a group of students currently enrolled in the Bachelor of Science in Information Technology program at the Polytechnic University of the Philippines – Santa Rosa Campus. We are working on a project called "AI-Driven Web-Based Resort Reservation System with Sentiment Analysis for Terrazas de Teodora Pavilion and Resort" as part of our Fundamentals of Research course for the first semester of the academic year 2024–2025. The goal of this project is to create an innovative system that improves user experience and service quality by optimizing the resort reservation process and incorporating sentiment analysis and customer feedback.

We humbly ask that you take this into account and become our official client for this initiative. Your participation would be essential to our study, and we think your knowledge and experience would be very helpful in the creation and success of the system as a whole. It would be a pleasure to work with you and get your insightful opinions on the system we are creating.

We appreciate your consideration of our request. We are excited about the prospect of collaborating with you on this project and helping Terrazas de Teodora Pavilion and Resort succeed.
